

Our waste composting facility processes your household waste from the green topped bins, which is converted to compost. **To take a tour, please call 08 9256 9528.**

1 Your bin is collected

2 by the council waste truck

3 the contents are taken to the SMRC

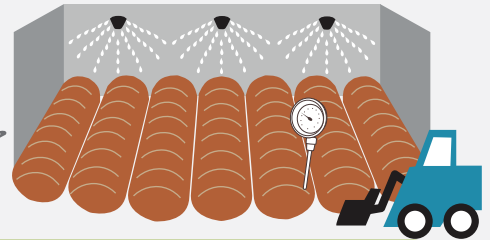

4 where they are dropped off

5 the large and dangerous items are sorted

6 waste is loaded into giant composters which turn for 3 days

7 compost is screened for inorganic material

8 compost is then kept in rows in a giant shed and watered for 4-6 weeks

9 compost is screened again

10 inorganic material is removed

11 compost is taken and further processed to be used on farms, parks and gardens
