SPT2010-4      WATER CONSERVATION STRATEGY REVIEW AND NEW ACTION PLAN - PROPOSED AMENDMENT BY CR SU GROOME	1

## SPT2010-4– WATER CONSERVATION STRATEGY REVIEW AND NEW ACTION PLAN

### Proposed amendment by Cr Su Groome

To amend the Officers recommendation to read as follows:

1. Note the progress made by the City **and the residents of the City of Fremantle** in the area of water conservation over the past six years since adoption of the Water Conservation Strategy.
2. Rescind the Water Conservation Strategy as a current document on the basis that it has expired.
3. Adopt the Water Conservation and Efficiency Plan 2020-2025 as provided in Attachment 1.
4. **Recognise the need to comprehensively review water management and conservation strategies prior to preparing an updated Plan for 2025-2030, taking into account alternative water sources, new technologies and the impact of climate change on environmental water uses.**

### REASON FOR CHANGE:

To recognize the water savings achieved by residents of the City of Fremantle as well as the City itself over the past 6 years, and to flag the need for a more comprehensive review of water management (incorporating, amongst other things, consideration of embodied energy and environmental impacts of different water sources, impacts of declining rainfall, emerging science regarding the use of water in the landscape, and further consideration of alternative water sources) in the future.
