

I'm excited to nominate for East Ward, the opportunities for us are boundless, it's already a very desirable place to live and over the next 4 years I look forward to continuing to improve it. With my family I call this place home, my daughters go to school here, we play sports here and we walk our streets. Through these connections with the community I understand community priorities and I value a strong vibrant community.

Many residents have spoken to me about traffic on their local streets and I would like to explore ways to address this including a trial to reduce speeds in suburban streets to 40km/h.

I value our public open spaces, including Samson Park and Hilton Park Precinct and I will work to ensure that these areas are improved, maintained, accessible and a place for all.

Our sporting and community clubs provide us a strong sense of community and contribute to our health and wellbeing. The role of Council is to support these clubs in their pursuits, work with them to improve infrastructure and encourage community participation.

Our urban tree canopy is vital to create desirable areas for people to live as well as providing important habitat, prioritising planting by the City. I will also support efforts to maintain mature trees when land is developed.

O'Connor makes a significant contribution to the Fremantle economy, I will encourage the establishment of new businesses and industries so that there are local employment opportunities. I will also continue to work to improve the economy of Fremantle more broadly.

I have a collaborative working style which enables me to achieve outcomes, combined with my experience on Council, corporate background and strong community connections I will be able to realise the potential of our suburbs.

I'm accessible, down to earth and work with integrity, I'm open to discuss ideas with community members and will work hard to realise our potential.
