I have a deep love for our great city. Freo's leadership on issues such as sustainability and reconciliation has inspired me to look for areas in which I can make a positive impact.

I am currently a student of Law and Sustainable Development, the State Coordinator for the Australian Youth Climate Coalition, and work at Gage Roads. These experiences have taught me valuable skills in analysing information and understanding how to effect change in various levels of government.

My focus is on enhancing the core values of Freo, to preserve our close-knit community as population grows and climate impacts worsen. I am dedicated to continuing our climate-conscious leadership, support of the arts, and aligning spending with the community's values.

With the required passion, motivation, and capability, I am dedicated to collaborating towards a thriving future for all. Not aligned with a political party or higher government aspirations, I seek impactful change through effective leverage points.
