

### **Additional Information**

Only 2000 additional characters?! Ok, here we go folks...

#### **COMMUNITY ENGAGEMENT**

Fremantle's greatest strength is our diversity - a vibrant mix of voices, ideas, and experiences that enrich us in every way.

Within our community we have generations of lived experience, along with people carrying remarkable knowledge and outstanding qualifications to draw upon.

Important matters and great challenges continually emerge and evolve in North Ward, and greater Fremantle, demanding our sharp focus. Local wisdom, and active, meaningful community participation in decision making and direction is more important than ever.

#### **SUSTAINABILITY . IN EVERY WAY**

It's about keeping Fremantle thriving environmentally, financially, and socially - a triple bottom line. Healthy cities don't view anything in isolation; everything is an interconnected ecology where every decision and direction creates an impact - be it a ripple or tidal wave.

- Protecting, expanding + ensuring access to our natural places especially our river, tree canopy coverage and Booyembarra Park.
- Building resilience for local businesses and organisations by creating an environment where they can flourish. We **MUST** retain, support and assist our cultural assets, it's to Fremantle's benefit in multiple ways.
- Seeding and nurturing ideas, opening up conversations, exploring possibilities/opportunities and turning the best ones into practical solutions that work for all of us.

#### **INCLUSION + PARTICIPATION**

All ages.

All abilities.

All backgrounds.

- Great cities are never monocultures - like Fremantle they are diverse, rich in culture, and full of character. Everyone should be able to pause, sit, or use basic facilities without needing to pay as though it's a privilege.
- Maintaining a city where people belong, regardless of life stage or financial situation, ensures we all bring our best selves to live, work, play, create, or perform and truly thrive here in this place we all love.
