City of Fremantle

Supply and Delivery of One 4x2 Jetting and Vacuum Excavator Truck FCC672/24

The Infrastructure Engineering Team is dedicated to maintaining the critical infrastructure that keeps the City of Fremantle community running smoothly. This includes managing stormwater systems to prevent flooding and protect public health. This is achieved by diligently maintaining drains, culverts, and pipes by clearing blockages and debris. Our goal is to celebrate the essence of Fremantle by maintaining these essential services. To support these efforts, the City of Fremantle requires a reliable Jetting and Vacuum Excavator Truck to assist in the upkeep of these vital assets.

These vehicle specifications have been designed to ensure suitability for the required tasks, durability, and compliance with operational needs.

This proposal outlines a design for a Supply and Delivery One (1) New Combination Jetting and Vacuum Drainage Truck capable of efficiently cleaning and maintaining the City's 4,200 Pits and 96,840 metres of drainage pipes. The purchase of a vacuum and jetting unit will allow the City Of Fremantle to provide an increased level of service for residents to clean and maintain a greater number of pits throughout the year and be available 24/7 to mitigate potential flooding risks and improve the overall functionality of the City's drainage system.

Documentation: Tender documents can be obtained by registering to the City's e-tendering portal at Tenderlink <https://portal.tenderlink.com/fremantle/>

Lodgement & Deadline: Tenders must submit their submissions electronically via the same portal no later than **2pm AWST, 03 February 2025**. Facsimile or hand delivered tenders will not be considered. Canvassing of Council members will result in disqualification. Further information can be obtained from Mario Rengifo (08) 9432 9933 during normal office hours.
