SCALE AT A3:	1:200	

SITE PLAN

LOT 871

Summary of works to be completed

- Dismantle existing front counter and remove all unnecessary electrical and plumbing to those spaces
- Build a new front counter
- Install wall/floor mounted tables
- Remove existing signage
- Instal new signage
- Paint interior walls in heritage colours (Same as exterior)
- Install shelving behind bar area

Notes

- Equipment will use existing electrical and plumbing infrastructure
- There is existing floor drainage and grease trap
- All wall penetrations will **not** go into “Heritage” walls, most walls have modern facade walls already in place.

Management Plan

Project – Make Shop11 Great Again

Construction Management Plan

Stage 1: Have all plumbing and electrical outlets running to the current front counter removed by contractors.

Stage 2: Remove front counter and dispose of materials.

Stage 3: Construct new front counter to specification (plans attached)

Stage 4: Paint walls in heritage colours.

Stage 5: Erect signage.

Heritage Management Plan

Interior walls all have non-heritage facades on top of the original heritage walls. So any wall penetrations will be into those non-heritage walls.

The use of heritage colours is consistent with preserving the heritage aspect of the space. They will be the same as the upstairs venue of Beerpourium:

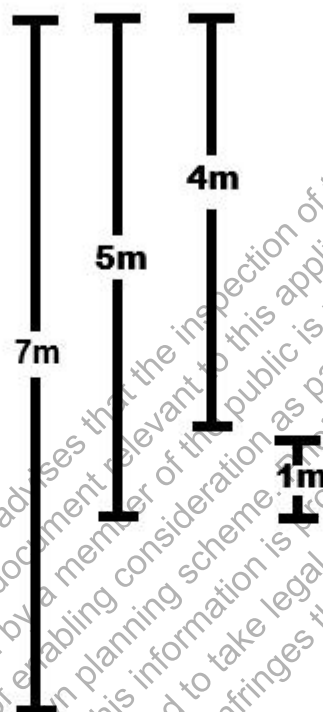

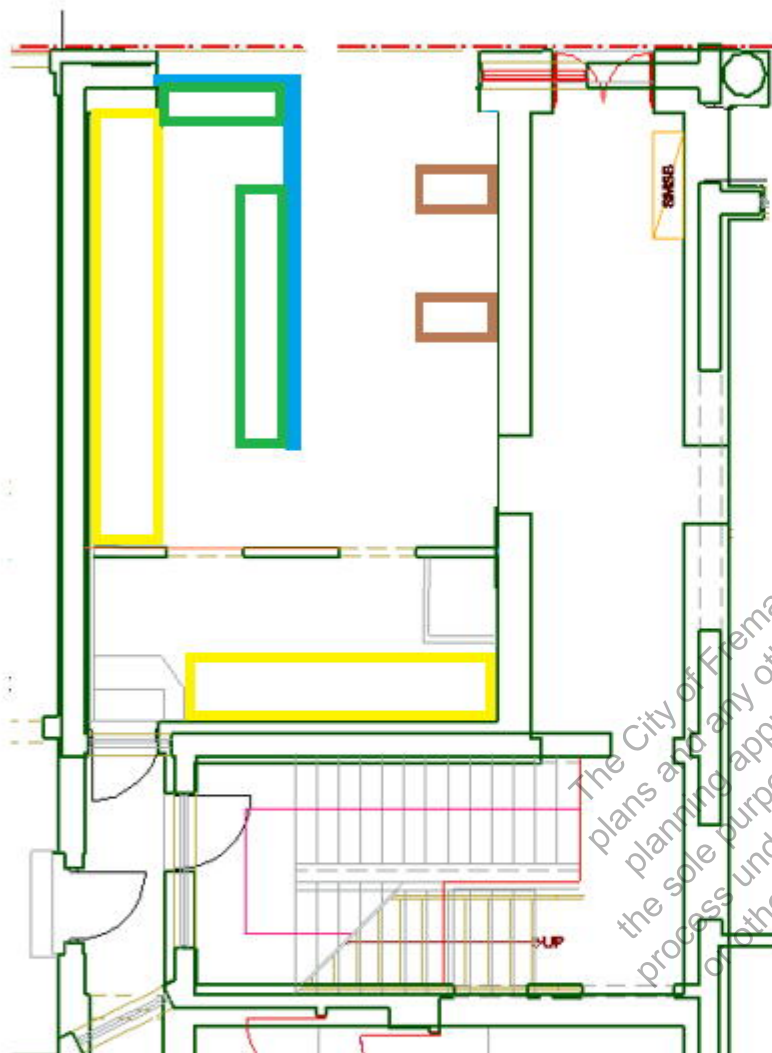

Walls - Sandbank colour

Door Frames – Cottage Green colour
